If we registered a domain name for you, and you would like to change anything about it, you can do so at http://manage.opensrs.net. You should be able to login using the master username and password we assigned you when your account was setup on our servers. If this does not work, you may submit a new ticket or email support@your-site.com and we will have the registrar send out the correct information to admin email address that is on file for the domain.
